COMPUTER-INTEGRATED MANUFACTURING SYSTEMS

Index to Volume 5 Numbers 1 – 4

1992

Title Index

Advanced manufacturing technology and accounting: A renewed alliance 199
AI-based decision support tool for strategic decision making in the factory of the future 83
Applying an optimization model to production management and logistics 239
Aspects of working conditions and safety in the use of industrial robots: an overview 69
CAD-CAM in Australia: flexibility quality and manufacturing strategy 300
Designing task-based user interfaces for large-scale CIM systems 91
Development of integrated manufacturing systems 39
Empirical assessment of the strategic orientation of JIT manufacturers versus non-JIT manufacturers 181
Engineering change administration: the key issues 125
Evaluating automated manufacturing technologies: Part 1 – Concepts and literature review 208
Evaluating automated manufacturing technologies: Part II – a methodology for evaluation 276
Feasibility of modular simulation models for FMSs 253
Generic architecture for intelligent control systems 105
Incorporating CIM optimization in manufacturing management strategy 311
Integrated management of a bishuttle FMS using a discrete/stochastic simulator 114
Intelligent scheduling of automated machining systems 3
Interactive tool for scheduling jobs in a flexible manufacturing environment 291
JIT approach to integrating production order scheduling and production activity control 283
Manufacturing processes from an industrial management viewpoint 269
MRPII implementation: key factors for success 31
Neighbourhood search-based optimization algorithms for production scheduling: a survey 167
Object-oriented approach to the specification of manufacturing systems 133
Operation of X-Cell – an intelligent cell control system 21
Order-winning criteria and factory automation: an empirical study 219
Performance analysis of network and database transactions flow in a CIM system 146
Petri net based node structures for distributed problem solving in FMS control 229
Pilot plants to assist FMS/CIM envaluation, design and industrial applications 54
Practical implementation of vision systems in a CIM environment 61
Real-time FMS monitoring based on flow-profiles and potential-graphs 190
SIBS – a job shop simulation-based scheduler 15
Technical and financial considerations of AGV use within multi-product and batch manufacture 97

Author Index

Archimede, B, Pun, L, Berard, Ch and Doumeingts, G 190
Balcerak, K J and Dale, B G 125
Banerjee, P and Armouti, H A 283
Bhimani, A, Bromwich, M and Brandimarte, P 167
Buxey, G 300
Chan, F T S 253
Dar-El, E M and Feuer, Z 15
Davis, W, Jones, A and Saleh, A 105
Devapriya, D S, Descotes-Genon, B and Ladet, P 229
Florusse, L B 269
Gupta, Y P, Lonial, S C and Mangold W G 181
Jackson, S and Browne, J 83
Joannis, R and Krieger, M 133
Joshi, J S and Desrochers, A A 146
Kovacs, G L 54
Kusiak, A and Ahn, J 3
Lee, R and Leonard, R 97
Mosca, P, Giribone, P and Schenone, M 11
Niel, E 69
O'Grady, P and Seshadri, R 21
O'Sullivan, D 39
Randhawa, S U and West, T M 208
Randhawa, S U and West, T M 276
Redarce, T and Lucas, Y 61
Roberts, H J and Barrar, P R N 31
Siemieniuch, C E and Sinclair, M A 91
Slomp, J and Gupta, J N D 291
Somers, T M and Gupta, Y P 219
Speranza, M C and Ukovich, W 239
Tie, H Y and Lin, G C I 311

Books Index

Bjorke, O Computer Aided Tolerancing 78
Buckroyd, A Computer Integrated Testing 246
Compton, W D Design and Analysis of Integrated Manufacturing Systems 245
Cousins, S A Integrating the Automated Factory 78
Duncan, W L Just-in-time in American Manufacturing 79
ESPRIT Consortium AMICE Open System Architecture for CIM 79
Rosander, A C The Quest for Quality in Services 80
Roy, R A Primer on the Taguchi Method 246

Running Series Index

Designing Production Order Scheduling Tools

Applying an optimization model to production management and logistics 239
Intelligent scheduling of automated machining systems 3
Interactive tool for scheduling jobs in a flexible manufacturing environment 291
JIT approach to integrating production order scheduling and production activity control 283
Neighbourhood search-based optimization algorithms for production scheduling: a survey 167
Performance analysis of network and database transactions flow in a CIM system 146
Petri net based node structures for distributed problem solving in FMS control 229
SIBS – a job shop simulation-based scheduler 15

CIM in Australasia

CAD-CAM in Australasia: flexibility quality and manufacturing strategy 300
Incorporating CIM optimization in manufacturing management strategy 311
